(54) INSTRUMENT ILLUMINATING DEVICE

illuminate a dial 4 and a pointer 5.

COPYRIGHT: (C)1998,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To provide an instrument illuminating device which can reduce the number of components, and the man-hours of assembly using the front glass pane of an instrument of illumination.

SOLUTION: A light source 10 is arranged at the distal end of a prism part 17 which is formed by folding back a front glass pane 16 at the front edge of a brim 11b of a facing 11, and which is projected along the outer surface of the brim 11b. Light from the light source is introduced into the prism part 17, and is then reflected at a reflection surface 19 in the prism part 17 so as to
